#PN3031 | LC 298

## DELPHI IGNITION COILS

**Delphi** WE RESEARCHED WHY OTHER COILS FAIL.  
THEN BUILT OURS TO LAST.

- Delphi coils are designed—and endurance tested—to resist the common stresses that cause failure.
- We've used our 100 years of OE ignition system experience to create a world-leading magnetic design and modeling capabilities.
- The result is an efficient coil design that ensures the power in the coil has a streamlined path to the spark plug. This design also reduces the occurrence of shorts inside the coil.

## DELPHI CHASSIS PARTS

### ✓ THE DELPHI DIFFERENCE

- Low friction ball joint technology matches the OE, for optimum performance in modern steering systems.
- Every part is developed and tested alongside the OE part to guarantee matching fit, form and function.
- Precise robotic welding of control arms delivers consistent quality
- Buckling force testing applies the forces the part will encounter during its life to provide safety for vehicle occupants.
- Cathaphoretic coating offers protection against corrosion by salt, dirt and water, providing durability and a long life.
- Ultrasonic flaw detection and 100% crack detection ensures safety-critical components are manufactured to guarantee safety every time.
- Best-in-class assembly manufacturing for ball joints ensures OE matching pull out resistance and low breakaway torque, providing safety and quality with every part.

**BALL JOINTS - CONTROL ARMS**  
**TIE ROD ENDS - SWAY BAR LINKS**

We encourage all of our employees to become ASE-certified Parts Specialists. Proof that a counterperson is knowledgeable and highly qualified to service the professional installer.

## PREMIUM BRAKE PADS & ROTORS

### PADS & ROTORS

**AVAILABLE IN  
SELECT AREAS!**

Brembo braking components are built on decades of experience, research, and lessons learned on and off the track. Whether you're looking for a long-lasting ceramic brake pad that delivers a comfortable daily commute, or a high-performance brake rotor with low-met brake pad setup, we have the products that match your needs.

## A BLENDED PROGRAM TO MEET ALL YOUR NEEDS!

- Our new blended Turbocharger program offers your choice of both new and reman turbochargers and accessories from several manufacturers to fit your needs! Our offerings provide OE-Quality, precisely calibrated, high-performance turbochargers designed to meet the durability, reliability and technology demands of complex engines.

## THE NEW DEMAND FOR TURBOCHARGERS

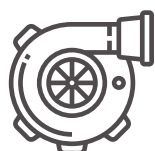

**1STOPSHOP**

### WHY TURBO?

- While Diesel passenger cars are the main consumers of turbos, gasoline-powered vehicles utilize them as well. Why turbo? Simple. Downsized engines are needed to meet new fuel and emissions standards. Turbos improve power and economy up to 40%.

Small Engine

Turbocharger

Fuel Economy

Power

The turbo market is **expected to grow** significantly over the next 4 years to **more than 8 million** units, a 22% increase!

PROFESSIONAL BRAKING TECHNOLOGY

## ROTORS

### FREE UPGRADE TO COATED OR PAINTED!

#### WHAT ARE THE BENEFITS OF GEOMET COATED ROTORS?

- **100% OE Exact Design:** For fit, form and function
- **OE Style Vane Configuration:** Allows efficient heat dissipation
- **It Looks Better:** GEOMET minimizes rusting and keeps your rotors looking good.
- **Good initial braking performance:** GEOMET is not greasy and is thin meaning it doesn't damage the quality of braking during the brake's first use.
- **High temperature resistance:** Can withstand up to 750°F and still provide excellent corrosion resistance without crystallization. It won't chip and will wear evenly.
- **Environmentally conscious coating:** There is no chromium in the solution and since it is applied in a closed system, the leftover liquid is recycled.
- **Thin and non-greasy:** Once cured, GEOMET is thin and non-greasy which makes it a great option for aftermarket products where the rotors are handled, shipped, and stored before being delivered to the customer. The coating keeps things clean and relatively light and will make sure you get your brakes in great shape. If you remember the old cosmoline coated rotors many used to protect the rotor during transit.....this had to be cleaned with soap and water prior to installation in order for the pads to seat in properly. Not so with Geomet, which brings to another benefit.....
- **FASTER JOB TURNAROUND:** Bay time is profit....how much time is wasted washing the rotors? This is a real benefit to your customers!

## CALIPERS

#### QUALITY REMAN CALIPERS:

- **OE Matched:** OE specs matched piston materials to ensure proper operating temperatures.
- **100% Quality Testing:** All units tested for leaks, free moving pistons and smooth sliding brackets.
- **New Parts:** New bleeder screws and rubber components used, ensuring an airtight seal.
- **No Cost Cutting:** Do NOT use Heli Coils; Do NOT fill casting holes or perform welded repairs to castings; NOT Salvaged
- **Complete Job In The Box:** Everything is included: banjo bolts, copper crush washers and parking brake cable brackets, levers and return springs...ALL Pre-Installed! (where applicable)
- **360 Coated Available:** Available gray e-coating protects against salt, snow and harsh elements! (600+ SKUs)
  - Ensures all calipers are coated evenly and to a similar thickness
  - Calipers and brackets do not have any surface areas without protective coating
  - The coating itself is microns thin and bonds with both aluminum and cast iron
  - Resists natural and synthetic brake fluids
- **Standard Rust Inhibitor Coated:** (3,900+ SKUs)
  - All calipers currently come with protective coating applied to the brackets and housings.
- **OEM Color Matched Calipers:** (450+ SKUs)
  - Powder coated calipers, where applicable, painted to match OEM applications colors

## FULL LINES OF WHEEL HUB ASSEMBLIES AVAILABLE!

## INCLUDING BCA, MEVOTECH AND SRT BRANDS!

OVER 80% OF PRODUCT IN  
BCA BOXES IS THE SAME OE-  
PRODUCT SUPPLIED TO THE OEM

- Application Unique Engineering
- Custom Designed Seals
- Premium Wheel Studs & Grease
- Precision Cage Design
- OE-Style ABS Plugs

### SRT QUALITY HUBS

- **Long Lasting:** Made of premium materials and built with rigorously controlled manufacturing processes
- **Strong & Durable:** Extra resistant to heavy loads and conditions
- **OEM Design:** OEM design and 100% inspection assures easy installation
- **Parts:** Superior oil seal, OEM approved bearing design, & more.

### MEVOTECH SUPREME HUBS

- **Increased Durability:** Designed with roll forming to lock internal components for a set preload right out of the box; Increased assembly stiffness reduces vibration and improves part life.
- **Precise Signal Quality:** Increased gauge and strain reliefs provide ABS cable with abrasion resistance and increased cable strength.
- **Pre-Filled with Premium Grease:** Premium lubricant withstands high temperature, extreme pressure, resists corrosion and reduces friction.
- **Premium Seal:** Multi-point sealing provides layers of defense to keep contaminants out and vital grease in.
- **Rigorous Testing:** Extensive in-house and third-party durability testing ensures ultimate performance and strength.
